Introduction to Global Variational Geometry

Preface	VII
Contents	XI
1 Jet prolongations of fibred manifolds	1
1.1 The rank theorem	1
1.2 Fibred manifolds	6
1.3 The contact of differentiable mappings	10
1.4 Jet prolongations of fibred manifolds	12
1.5 The horizontalisation	16
1.6 Jet prolongations of automorphisms of fibred manifolds	22
1.7 Jet prolongations of vector fields	26
2 Differential forms on jet prolongations of fibred manifolds	37
2.1 The first canonical decomposition	37
2.2 Contact components and geometric operations	44
2.3 The second canonical decomposition	45
2.4 Contact forms	47
2.5 Fibred homotopy operators	54
3 Formal divergence equations	65
3.1 Formal divergence equations	65
3.2 The cut formal derivative	70
3.3 Projectable extensions of differential forms	71
3.4 Fibred homotopy operators on jet prolongations of fibred manifolds	79
3.5 Integrability of formal divergence equations	80
4 Variational structures	86
4.1 Variational structures on fibred manifolds	86
4.2 Variational derivatives	90
4.3 Lepage forms.	93
4.4 Euler-Lagrange forms	104
4.5 Lepage equivalents and the Euler-Lagrange mapping	105
4.6 The first variation formula	109
4.7 Extremals	111
4.8 Trivial Lagrangians	113

4.9	Source forms and the Veinberg-Tonti Lagrangians	114
4.10	The inverse problem of the calculus of variations	122
5	Invariant variational structures	134
5.1	Invariant differential forms	134
5.2	Invariant Lagrangians and conservation equations	136
5.3	Invariant Euler-Lagrange form	140
5.4	Symmetries of extremals and Jacobi vector fields	141
Appendix		
	Analysis on Euclidean spaces and manifolds	149
1	Jets of mappings of Euclidean spaces	149
2	Differentiation of linear mappings with respect to a parameter	153
3	The rank theorem	154
4	Differential equations	155
5	Integration of continuous functions on compact sets	157
6	Local flows of vector fields	158
7	Calculus on manifolds	159
8	The trace decomposition	162
9	The Levi-Civita symbol	169
	References	175
